## BYPASS Dedicated to VAG cars

Thanks to Bypass, you can remove immo through OBD diagnostic plug. You can use it multiple number of times.

Once plugged in, the tool would send a request to the ecu to start communication.

It recognizes ECU type automatically.

Then, once communication has been established the tool checks to see if immo OFF procedure has been conducted correctly.

**Bypass is the only device in the world that can remove immo from different types of VAG ECUs automatically.**

**No additional settings necessary. Just turn ignition and plug it into OBD. In a few seconds, immobiliser will be removed.**

\* Personal collection possible. Each bypass has got an Identification Number which is recorded and kept in our system.

### How it work

- turn on the ignition switch and wait 20 seconds
- connect the device to the diagnostic plug
- once connected, blue LED blinks fast. After about 40 seconds, the LED starts to blink slowly which signalizes that immo procedure has been conducted successfully.

**Use:**

**TDI EDC16 CAN + K-line  
TDI EDC15  
Gasoline Bosch ME7**

**Tested on the following electronic control units:**
